

MPO

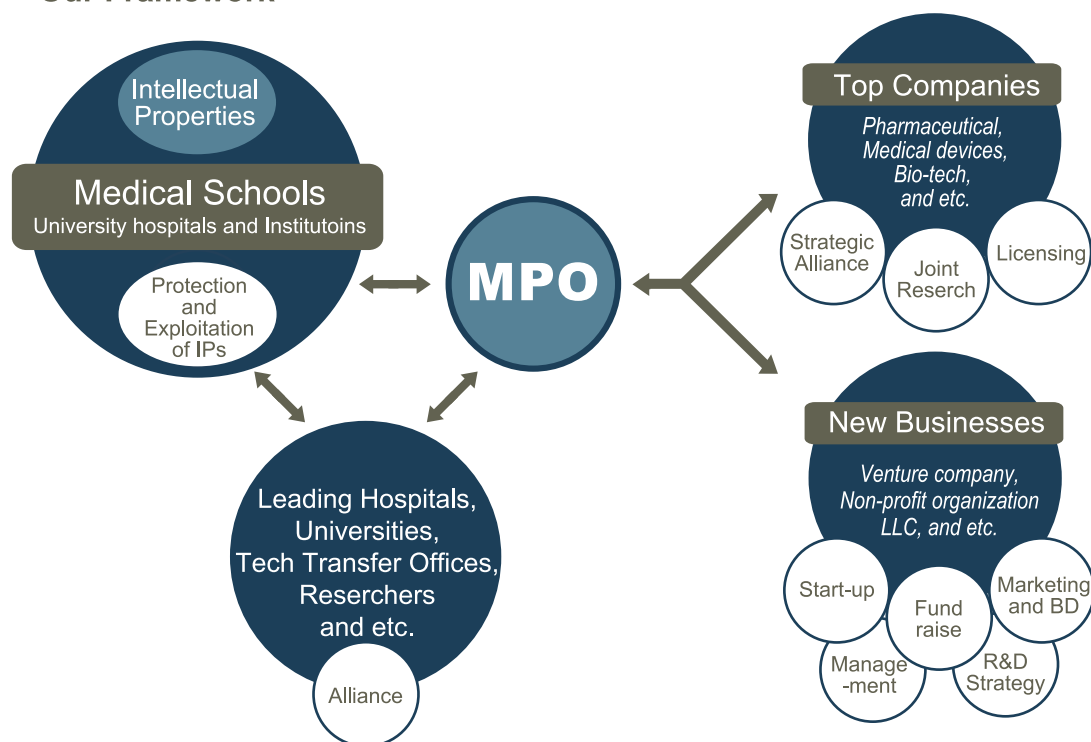

Licensing & Technology Transfer in Life Science Industry

MPO provides support for a wide range of life science technology transfers in Japan. Through our activities, innovations are incorporated into products, services and new businesses that directly benefit society.

Services and Activities

We evaluate and consult regarding the intellectual property (IP) portfolios of medical schools, hospitals, and TTOs. Based on these portfolios, we offer new business opportunities for companies and universities, and support developing the value of the business through our comprehensive consulting services. To establish and incubate start-up companies, we help with fund raising, management and marketing.

Our Framework

What We Do

- Strategic planning and global exploitation of IP through licensing and technology transfer
- Partner matching for global business/technology development
- Promote start-up, fund raising, marketing and business operations in Japan
- Establishment, setup, and management of offices in Japan (venture company, LLC and NPO)
- Consultation and coordination for clinical trials, pre/non-clinical studies and toxicity tests in Japan

Contact Us

Please feel free to contact us for any questions. You may reach us at info@mpo-inc.co.jp or by calling our office directly at +81-44-979-1631.
